

THE FUTURE OF MOBILITY

LIGHTER, STRONGER, SMARTER WITH CARBON WHEELS

NEVER-SEEN PRICE

Starting at \$950, our carbon wheels offer groundbreaking affordability for OEMs.

PRECISION ENGINEERING

Made in France using patented carbon fiber technology, combining innovation with the highest standards of production.

DURABILITY & STRENGTH

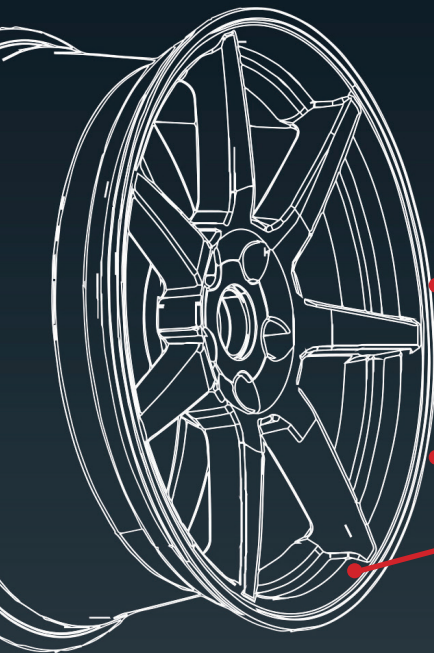

Despite their lightness, our wheels are engineered to withstand extreme conditions and provide long-lasting durability.

50% WEIGHT REDUCTION

Experience improved acceleration, handling, and braking performance with wheels that are half the weight of traditional aluminum.

OPTIMIZED FOR EVS

Extend battery life and range with wheels designed to maximize energy efficiency in electric vehicles.

INDUSTRIAL-SCALE PRODUCTION WITH PATENTED TECHNOLOGY

C-INERTIA operates with a **patented manufacturing process** that ensures high-volume production capacity, allowing us to deliver significant quantities of carbon fiber wheels at an accelerated pace while maintaining rigorous quality standards. This innovative technology enables us to:

Rapid production timelines, ensuring quick delivery for high-demand orders.

Scalability, with the capability to produce significant quantities to meet large-scale OEM demands.

Consistency in quality through advanced automation and precision engineering.

TECHNICAL OVERVIEW

PATENTED CARBON FIBER TECHNOLOGY

Our carbon wheels are the result of over 6 years of research and development. Utilizing advanced materials and cutting-edge manufacturing processes, we offer wheels that outperform aluminum in weight, strength, and overall efficiency.

MATERIAL COMPOSITION

Crafted from 100% carbon fiber with a high-strength resin matrix, offering superior performance.

WEIGHT

Up to 50% lighter than aluminum wheels, reducing rotational mass for enhanced vehicle dynamics.

PERFORMANCE

Designed for premium cars and electric vehicles, our wheels improve cornering, braking, and acceleration, delivering a smoother, more responsive driving experience.

Our production process is designed to support **OEM partnerships**, providing tailored solutions to meet specific technical requirements. The combination of **speed, reliability, and cost-efficiency** positions C-INERTIA as an ideal partner for large-scale industrial production.

We also have an **in-house testing laboratory**, equipped with multiple test benches, allowing us to conduct comprehensive development and performance tests. This capability ensures that our products meet the highest safety and quality standards, giving OEMs full confidence in the **reliability** and **seriousness** of our company.

APPLICATIONS

Our carbon fiber wheels are perfect for:

PERFORMANCE VEHICLES

Improve acceleration and handling in high-performance cars.

LUXURY & PREMIUM VEHICLES

Enhance efficiency while maintaining a sleek, modern aesthetic.

ELECTRIC VEHICLES (EVs)

Maximize range and energy efficiency, crucial for the future of sustainable mobility.

WHY CHOOSE C-INERTIA?

C-INERTIA is a leader in carbon fiber technology, offering innovative solutions for the automotive industry.

Our patented technology allows for **large-scale production** of high-performance carbon wheels at a price point previously unattainable. Combining **French precision engineering** with **disruptive technology**, we are setting a new standard in mobility.
